

SETHU Investor Appendix B: Architecture and Integration

Generated: 2026-03-28T13:18:27.607Z

- Entry channels: Firebase auth (portal), API key (service-to-service).
- Migration Center: config generation, validation, activation, persisted mode state.
- Ledger path: /v1/sethu/ledger/* (Hedera Hiero/public, optional Hyperledger Fabric); Agent path: /v1/sethu/agents* (registry/store). AI blockchain: registration anchoring and negative-events log on request from TokCredAI.
- Orchestrator, sub-agents, and trace API operate in TokCredAI.
